

IAN SIRYA KATANA

Lead Full-Stack Developer & Digital Systems Lead

Dubai, United Arab Emirates | Hello@iankatana.com | +971 52 144 0383 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Lead Full-Stack Developer and Digital Systems Lead with experience building and managing business-critical web platforms, CRM systems, dashboards, booking workflows, internal tools, and multi-brand digital products. Skilled in React, TypeScript, Node.js, Laravel, Supabase, PostgreSQL, WordPress, Shopify, API integrations, analytics tracking, and performance optimization.

Experienced in translating business requirements into scalable technical solutions across real estate, student accommodation, staffing operations, e-commerce, nonprofit, beauty, investment, and corporate environments. Strong background in full-stack application development, workflow automation, role-based systems, payment integrations, e-signature workflows, SEO architecture, UI/UX improvement, and multi-brand website management.

Known for combining hands-on development, systems thinking, stakeholder communication, technical leadership, and business process understanding to deliver digital solutions that improve efficiency, reduce manual work, and support measurable business outcomes.

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer & Digital Systems Lead | Oct 2025 - Present

GIOVANNI | Dubai, United Arab Emirates | Full-time | On-site

Promoted into a wider technical leadership role focused on building and improving business-critical digital systems, internal platforms, CRM workflows, dashboards, booking journeys, and multi-brand web applications.

- Lead full-stack development across company websites, internal systems, dashboards, and operational platforms.
- Design and improve CRM workflows, booking processes, student accommodation journeys, payment flows, and role-based admin tools.
- Translate requirements from directors, operations, sales, finance, marketing, and customer service teams into scalable technical solutions.
- Work across React, TypeScript, Node.js, Laravel, WordPress, Shopify, Supabase, APIs, analytics tools, and cloud-based environments.
- Manage integrations including payment gateways, CRM workflows, analytics tracking, Google Tag Manager, email systems, and third-party APIs.
- Identify operational gaps and manual processes, then design improved software workflows to increase efficiency, visibility, and control.
- Support digital transformation initiatives by replacing disconnected manual processes with structured, scalable business systems.
- Improve UI/UX for complex systems including dashboards, booking interfaces, form journeys, cancelled-state handling, admin workflows, and role-based access.

Lead Web Developer | Oct 2024 - Sep 2025

GIOVANNI | Dubai, United Arab Emirates | Full-time | On-site

Promoted from Web Developer to Lead Web Developer after taking ownership of multiple company websites, integrations, technical workflows, and delivery coordination across business units.

- Led development and maintenance of subsidiary websites, landing pages, CMS platforms, and digital assets.
- Coordinated with designers, developers, marketers, and stakeholders to deliver technical updates and campaign requirements.
- Managed website performance, mobile responsiveness, SEO structure, bug fixes, plugin updates, hosting support, and security improvements.
- Implemented API connections, form workflows, CRM integrations, analytics tracking, and marketing tool setups.
- Supported project planning, task allocation, delivery timelines, QA reviews, and technical troubleshooting.
- Improved website quality, user experience, speed, scalability, and reliability across multiple business brands.
- Built investor-focused websites and microsites to showcase real estate, business, and corporate projects.
- Provided advanced technical support for website issues and collaborated with customer service and operations teams.

Web Developer | Mar 2024 - Sep 2024

GIOVANNI | Dubai, United Arab Emirates | Full-time | On-site

Started as a Web Developer responsible for building, maintaining, and improving company websites, landing pages, CMS content, and frontend user experiences.

- Built and maintained responsive websites, landing pages, and website sections across company brands.
- Performed CMS updates, layout improvements, bug fixes, mobile optimization, and speed improvements.
- Supported SEO implementation, Google Analytics, Google Tag Manager, and campaign tracking requirements.
- Collaborated with design and marketing teams to turn visual concepts into functional web pages.
- Assisted with hosting, domain, email, DNS, and technical website support.
- Delivered regular website updates while building deeper responsibility across systems, integrations, and business workflows.

Full-Stack Web Developer | Aug 2023 - Sep 2024

TSHTKING | Remote, United States | Freelance

- Delivered full-stack web development and technical support for client websites and digital platforms.
- Developed responsive websites and custom web interfaces using modern frontend technologies.
- Implemented CMS updates, backend integrations, payment workflows, and performance improvements.
- Supported UI/UX enhancements to improve usability, mobile responsiveness, and conversion flows.
- Managed technical troubleshooting, bug fixes, hosting support, and website optimization.
- Worked with stakeholders to understand project requirements, define scope, and deliver practical digital solutions.
- Supported integrations for forms, APIs, analytics tools, payment gateways, and CRM-related workflows.

Full-Stack Web Developer | Dec 2021 - Nov 2023

TOURKAL INVESTMENTS LIMITED | Dubai, United Arab Emirates | Full-time | On-site

- Developed and optimized company websites, landing pages, and digital assets for business growth, marketing visibility, and user experience.
- Designed and developed responsive websites using HTML, CSS, JavaScript, Bootstrap, WordPress, and Elementor.
- Created website layouts, graphics, and visual assets using Figma, Photoshop, and Illustrator.
- Implemented SEO improvements including keyword research, metadata optimization, URL structure, XML sitemaps, robots.txt, and content optimization.
- Used Google Analytics, Google Search Console, Microsoft Clarity, and other tools to monitor traffic, user behavior, and site performance.
- Improved page speed, mobile responsiveness, and technical website quality.
- Collaborated with content, marketing, and business teams to align websites with campaign and brand objectives.
- Customized WordPress and Elementor functionality, design, and layouts to meet client and business requirements.
- Supported technical SEO best practices to improve indexing, crawling, and search visibility.

Web & Systems Administrator | Mar 2021 - Mar 2022

SKYMART KENYA | Kenya | Freelance | Hybrid

- Managed and improved e-commerce website operations, performance, security, and user experience.
- Maintained e-commerce platform stability, product content, website performance, and customer-facing functionality.
- Implemented security practices to protect customer data, transactions, and website reliability.
- Supported inventory-related website workflows, product updates, localization, and content management.
- Monitored website speed, usability, and technical issues to improve customer experience.
- Collaborated with marketing and design teams to update campaigns, product visuals, and promotional content.
- Supported website optimization for mobile users and international audiences.
- Assisted with international e-commerce considerations including language, currency, product content, and region-specific user experience.

Senior WordPress Developer | Jan 2020 - Nov 2020

METACORP AGENCY | Dubai, United Arab Emirates | Full-time | Hybrid

Promoted to Senior WordPress Developer after taking ownership of more complex website builds, theme customization, plugin workflows, performance improvements, and client-facing technical delivery.

- Led the development of custom WordPress websites, themes, templates, and page structures based on client requirements.
- Customized WordPress plugins, layouts, and website functionality to support project-specific needs.
- Improved website performance, mobile responsiveness, security, and on-page usability.
- Provided technical guidance on WordPress best practices, CMS structure, content management, and maintainability.
- Supported client communication, project handover, troubleshooting, and ongoing website support.
- Delivered reliable, responsive, and scalable WordPress solutions across multiple client projects.

WordPress Developer | Feb 2019 - Dec 2019

METACORP AGENCY | Dubai, United Arab Emirates | Full-time | Hybrid

Started as a WordPress Developer responsible for building, customizing, and maintaining client websites using WordPress, themes, plugins, and responsive frontend layouts.

- Built and updated WordPress websites based on client briefs, brand guidelines, and design requirements.
- Customized themes, pages, menus, forms, plugins, and content structures.
- Implemented responsive layouts to ensure websites worked smoothly across desktop, tablet, and mobile devices.
- Supported website maintenance, bug fixes, plugin updates, basic security checks, and performance improvements.
- Collaborated with designers and project teams to turn visual concepts into functional WordPress websites.
- Assisted with client website handovers, CMS training, and technical support.

SELECTED PROJECT EXPERIENCE

Student Accommodation Booking & Operations Platform

- Designed and improved platform workflows for student applications, booking journeys, studio allocation, academic year dates, deposits, installment plans, staff actions, student portals, and operational dashboards.
- Worked with logic involving studio grades, contract types, check-in and check-out dates, reservation workflows, staff-created applications, and role-based system access.
- Supported integration concepts involving Stripe payments, e-signature workflows, email notifications, and hospitality/booking system APIs.

Internal Business Systems & CRM Workflows

- Built and planned internal systems to replace manual processes, centralize data, improve visibility, and reduce dependency on disconnected third-party tools.
- Designed dashboards, user roles, workflow stages, reporting logic, admin panels, and operational modules for business teams.
- Worked across sales, operations, finance, reservations, customer service, marketing, and management workflows.

Multi-Brand Website Development & Management

- Managed and developed websites across real estate, investment, nonprofit, beauty, corporate, and business service brands.
- Supported brands and projects including Synergy, AFFF, Urban Hub, Unity Livin, Centricity Holdings, Luther, Hollins Business Park, Giovanni, K-Beauty/MAEUM, Reign, Fairmont PM, Eden Asset Management, Pillars Holdings, Donate Quran, Mercy For All, and related business platforms.
- Delivered responsive website development, UI updates, SEO structure, analytics, campaign pages, technical support, hosting, DNS, and performance improvements.

UAE Staffing Operations CRM Concept

- Designed a UAE-focused staffing agency CRM concept covering staff sourcing, payroll, visa planning, medicals, airport pickup, warning letters, employee issues, uniform fitting, contracts, company clients, and workforce operations.
- Planned role-based workflows, admin modules, onboarding journeys, dashboards, and white-label SaaS architecture for future scalability.

Dubai Real Estate Operations Platform Concept

- Ideated a Dubai-focused rental operations platform to digitize the tenant journey from listing discovery to viewing, document submission, signing, payment, and ongoing tenant management.
- Designed workflows for property companies, agents, tenants, listings, viewings, documents, payments, and operational transparency.
